

The FlexPoint Migration Roadmap: What You Gain & How to Switch Today

This playbook details the financial and operational value Alternative Payments delivers and provides the three-step plan for a zero-downtime transition.

Introduction

The average MSP on FlexPoint faces workflow drag, hidden fees, and limited support. Alternative Payments offers a unified platform built for MSP efficiency.

The decision to switch is driven by maximizing profitability and removing friction. Here is the side-by-side view of Alternative Payments' capabilities vs. the FlexPoint experience:

FlexPoint

-  **High & Unpredictable Fees:** Pay \$0.25 - \$1.00 per ACH transaction.
-  **Slow Payouts:** Credit Card funding takes 3+ business days and ACH can take 5-6 business days, killing cash flow momentum.
-  **Zero Support:** Up to 4 days for an initial email reply, forcing staff to fix critical issues themselves.
-  **Operational Instability:** Forced bank changes, double payments, and client portal sync errors create daily chaos.
-  **Compliance Risk:** Not listed as SOC 2 Type II Compliant, leaving data exposed to unnecessary risk.
-  **Reconciliation Drag:** Basic reporting only, leading to manual work and clearing accounts.

Alternative Payments

-  **Predictable Cost Reduction:** \$0.00 ACH Transaction Fees.
-  **Rapid, Consistent Payouts:** Flexible options for 1, 2, or 3 business day payouts for full cash flow control
-  **Expert-Led Support:** Dedicated, hands-on support backed by a full in-house team. We solve the problem, not link to an article.
-  **Unified, Stable Platform:** Single, dedicated processor ensures stability, automated reconciliation, and accurate client portals.
-  **Guaranteed Reliability:** We are SOC 2 Type II Compliant, meeting the highest industry standard for security.
-  **Advanced Reconciliation:** Features like 95% Auto-Matched Deposits and Behavior-Based Client Insights eliminate manual work.

**Join the 1000+ MSPs who have already made the switch.
Our focus is a zero-downtime, fully supported migration.**

We eliminate the heavy workload of switching. Our dedicated White-Glove Implementation team handles the heavy lifting, saving you time and preventing errors.

Risk-Free Data Migration

We handle PCI-compliant data migration and full PSA and Accounting system integration for you. We guide you through the switch, eliminating the frustration and time wasted on self-onboarding.

Financial Security

We ensure your move is completely secure and financially backed, protecting your business against unexpected fees or transition costs.
